SUBJECT: UTILIZATION MANAGEMENT REQUIREMENTS

PURPOSE

To provide an overview of the Utilization Management Requirements for North Sound Behavioral Health Administrative Services Organization (BH-ASO).

POLICY

To define the process and requirements of North Sound-BH-ASO and its contractors.

DEFINITIONS

Concurrent Utilization Review: Review of an individual's care during an episode of care. Concurrent review focuses on the efficient allocation of appropriate, medically necessary resources during an episode of care. Concurrent review helps to determine whether delivery options for the most appropriate, medically necessary care are available, and whether individuals are improving as a result of the treatment being delivered.

Expedited Authorization Decisions: For timeframes for authorization decisions not described in inpatient authorizations or standard authorizations, or cases in which a provider indicates, or North Sound BH-ASO determines, that following the timeframe for standard authorization decisions could seriously jeopardize the Individual's life or health, or ability to attain, maintain, or regain maximum function, North Sound BH-ASO shall make an expedited authorization decision and provide notice as expeditiously as the Individual's condition requires.

Prospective Utilization Review: Review which occurs before care is delivered. Prospective review focuses on eligibility and medical necessity screening prior to the provision of requested services. This type of review also allows for referral to possible alternative services as appropriate. Also referred to as prior authorization review.

Retrospective Utilization Review: Review which occurs after an episode of care has ended. Retrospective review focuses on the efficient allocation of appropriate, medically necessary resources during an episode of care. Retrospective review also evaluates appropriate discharge planning to include timely discharge from services.

Utilization Management (UM): Quality Management (QM) process that addresses appropriateness of services (i.e., is the individual receiving what they need, when they need it and not receiving what they do not need when they do not need it).

Notification Only: Emergent, unplanned admissions to acute inpatient behavioral health facilities do not require prior authorization but do require notification of the admission within 24 hours or next business day.
